***Can artificial intelligence be racist?* Lecture by Omar Flórez**

We use artificial intelligence (AI) in our daily lives when it reduces our options to a group of usually exact predictions such as what to see on Netflix, what to read on an online newspaper or even which person to add on a social network. If it is so useful, then what is the problem with technology? Recently, these algorithms have been shown to contain biases and enhance stereotypes, and serious ethical problems have been uncovered; for example, these algorithms are usually less precise for individuals who belong to minorities and tends to be more exact when it learns about data sensible to age, gender or race. Flórez will speak about the mathematics responsible for predictive discrimination in artificial intelligence and why it is important for Latin Americans, women, Afro-Americans and LGTB groups to get together to promote progress in this industry. Doctor Omar U. Flórez is a researcher at Capital One and formerly a scientist at Intel Labs in Silicon Valley and implements artificial intelligence algorithms in order to facilitate natural dialogue between computers and human beings.

50 years after the Velasco coup. Hugo Neira and Héctor Béjar in conversation with Alberto Vergara

On 3 October 1968, General Juan Velasco Alvarado carried out a coup d'état that also brought an abrupt change to the economic, social, political and cultural life of Peru. Half a century on, the debates and questions about the nature of that regime, as well as its consequences (positive for some, negative for others) have accumulated, without clear-cut answers having been given. To tackle these questions, the panel is made up of two well-known intellectuals who both participated in their own way in the Velasco regime. Héctor Béjar is a Doctor in Sociology from the Universidad Nacional Mayor de San Marcos and won the Latin American Casa de las Américas Non-fiction Prize for his book *Perú 1965: Una experiencia guerrillera*. Hugo Neira is a Doctor in Social Sciences from the École des Hautes Études en Sciences Sociales in Paris, France, and an acute and prolific observer of the Peruvian reality for more than five decades. The conversation will be moderated by the political scientist Alberto Vergara.
